Warendorf, 17.08.2023

To whom it may concern,

As CEO at Treecastle Studio, I have had the privilege of working with Odysseas Tsiridis for the 18 weeks he interned as a game designer at Fishing Cactus. I was the game director and art lead for the co-development project between Treecastle Studio and Fishing Cactus that Odysseas worked on for the duration of his internship.

During his tenure, Odysseas dramatically surpassed any expectations that would have been fair to put on him given his role as a project intern. Right from the beginning he provided a steady output of high quality work and very soon adopted full responsibility of game and level design for the project. He played a pivotal role in refining the project vision and solidifying the gameplay direction. He worked proactively and created foundations for the game design that helped move the project forward and paved the way for future development. Odysseas was not only reliable and dedicated but also exhibited a strong work ethic and a staggering resilience against the ever expanding scope of his responsibilities.

In addition to his professional skills, Odysseas exhibited a positive attitude and outstanding interpersonal skills. He was well-liked by colleagues and displayed a genuine ability to collaborate with others and create a supportive and productive work environment.

I am confident that Odysseas will be an invaluable asset to any organization he joins and will make a meaningful contribution in their new role. I strongly endorse Odysseas without reservation and believe that he will exceed all expectations. Our organization would not hesitate to rehire Odysseas if ever given the chance.

Please feel free to contact me at mail@treecastlestudio.com if you require any further information or clarification.

Sincerely,

A handwritten signature in black ink, reading 'Daniel Lieske', followed by a horizontal line.
